```

```

Concatenated String: Hello World
Sliced String (first 5 characters): Hello
'World' found in the string.
Replaced String: Hello Python
Formatted String: My name is Alice and I am 30 years old.
Repeated String: Hello! Hello! Hello!
Lower Case String: hello world
Upper Case String: HELLO WORLD
Title Case String: Hello World
Capitalized String: Hello world
Split String: ['Hello', 'World']
Joined String: Hello, World
Index of 'World': 6

```
